Russ,

Great – thank you.

Bob:

**For Biostimulants:**

The “Draft Guidance for Plant Regulator Label Claims, including Plant Biostimulants” has been completed, reviewed by OGC, BPPD, OPP, and OCSPP management and is now being edited in response to comments by the IO-OCSPP. Schedule: Complete edits for final review by IO-OCSPP by late August; have draft ready to submit to OMB by early to mid-September.

**For Biochemical Classification Committee:**

I have established permanent, bi-weekly meetings (beginning on 8/27) of the BCC to discuss and provide recommendations on new and ongoing Biochemical Classification applications, as well as re-consideration of previous decisions based on new information. Since Jan. 1, 2018, the Committee has made 11 Biochemical Classification recommendations (all Biochemicals). Typically we only do approx. 12 in a calendar year. Five more are under review (3 new applications, two potential re-classifications: AITC and Silver Nitrate) On Monday August 13, 2018, the Committee met to reconsider (for the second time) reclassification of Sabadilla Alkaloids from a Conventional to a Biochemical. The Committee unanimously voted for SA to remain a Conventional. We are still awaiting additional information on Nootkatone before proceeding with BCC review.

Current Schedule:

08/27: Wood Vinegar and COS-OGA

09/10: AITC (potential reclassification to Conventional)

09/24: Silver Nitrate (potential reclassification to Conventional) and Thymyloxyacetic Acid

Others as they appear. There is one coming in, but the applicant won't describe over phone; awaiting arrival of information.

There a few other things that I will give to Shannon for the RAB report.

Russ

**Importance:** High

We need to get this to Rick by Sept. 6. Here is the format we used last year:

**Registration Results:**

- New ai decisions reached vs. target
- New ai registered ( we can project for the last 3 weeks of FY)
- New uses registered vs target ( we can project here too)

**On time completions: 100%?**

**BPPD's # of days exceeding PRIA Date** for new ais not registered by original PRIA date ( this is the new metric for Henry Darwin)

- Goal – 303 days
- Actual – 95 days??????

**Renegotiation Rate:** here, also highlight how our total # of actions increased by 25% or more.

**Reg Review results: ShaRon can fill in.**

Targets by category

Actuals by category ( we can project here, too)

**Important Other Stuff** ( last year we had about 10 items with 3-4 sentences each on things like Biostimulants, the Reorganization, Zika, HED/BPPD pilot on biochemicals being conceived, Novel RNAi PIP, Wolbachia EUP and section 3 registration). This year, I think the well is a bit dry, but here are some ideas – can you think of others?

- IPM Strategy – would be good to get done by Sept 30 -- Frank
- Tolerance Workshop -- John
- IPM Webinars -- Frank
- Biostimulants? Maybe work with USDA ?? -- Russ
- Implement Reorganization -- Bob
- Interesting section 3 registrations -- All
- Interesting EUPs – All
- Interesting Reg reviews -- ShaRon
- FDA and EPA efforts on GE Insects and launching the Elizabeth effort with Eric – Mike
- RAB's efforts to standardize efforts and coordinate with HED committees – Judy and Shannon
- BCC reconstitution efforts - Russ
- Gene editing???????? -- Mike
- SAP – Anne and Mike
- Others?

Can you get me your suggestions of things to add to this list by Aug. 27, and draft language and #s by Sept. 4?

We can discuss tomorrow – Tuesday – at our managers' meeting.

Thanks

Bob
